Contributing ideas that work

We are a small group of Vietnamese professional translators who currently live in the States and in Vietnam. We have worked in the linguistic area for many years. As translators, we always put our native Vietnamese heritage and language skills to work in a dynamic and changing environment. We travel to Vietnam to ensure that our knowledge of the language and other technical skills are current, with the ever-changing environment within our country.

We are capable of translating for the Vietnamese audience in the States as well as in Vietnam. We have professionals residing in Vietnam, who help us accurately translate a major product to its intended readers without the risk of offending them.

Over the years, we have developed our internal glossaries and software to track the terms used for each project, no matter how small or sizable it is. Our quality process always requires a document to be reviewed by 2 sets of eyes, before being sent out to you.

Translation - Editing - Transcribing
Business & Marketing, Technical, Hardware/Software, Legal and Medical

Expertise that brings insight
